**Start Position:** Holstered loaded handgun. Standing with Heels on Start Line holding Ballistic Shield. Shield must be positioned so that you can look fully through the Viewport.

**Course Description:** You are on the scene of an active shooter call at a business. Backup is at least 10 minutes away. You are positioned at the corner of the building and hear gunfire and screaming. If you do not enter now it is assured that innocent persons will be killed. When you arrived you pulled your Ballistic Shield from your cruiser and brought it with you.

On the Start Signal, enter the structure and engage Threat Targets 1 through 10 as seen.

**NOTE:**
- The Ballistic Shield must be carried so as to protect your upper body and you must look through the Viewport at all times except when Reloading or taking Immediate Action. One warning will be issued for failing to use the Viewport. Afterwards Procedurals will be assessed.
- One Procedural will be assessed for each Threat Target engaged if the handgun is not sighted through the Viewport.
- All Reloading: For Safety Consistency the handgun will be placed in the holster and magazines exchanged as needed.
- Slide Release: May only be done using the Slide Release, or hooking the rear sight on the side of the Ballistic Shield with the muzzle downrange.
- Immediate Action: TAP the Magazine on the side of the Ballistic Shield, RACK the slide by hooking the rear sight on the side of the Ballistic Shield with the muzzle down range, and engage threats if still necessary.
- Feedway Clearance: For Safety Consistency, lower the Ballistic Shield directly in front of you to provide cover to your lower torso and legs and use both hands to LOCK the slide open, RIP out the magazine, RACK the slide several times, TAP in a new magazine, RACK the slide and be READY to engage threats if still necessary.
