Course Description: You have been dispatched to suspicious activity at an industrial complex parking and storage area. You arrive on scene and see several people on the left side of the building. Your back-up is approximately 15 minutes away so you decide to approach. The subjects are dressed in gang related clothing and immediately accuse you of harassing them but provide their driver's licenses. You are in the process of calling their information into communications to check for warrants when you hear voices behind the fence you are standing in front of. As you briefly look to your right the subjects in front of you pull guns from their waistbands.

On the Start Signal engage Threat Targets 1 thru 12 as they become visible from within the Firing Area.

NOTE: Walls are simulated cover and must be used accordingly / The gate is made up metal wire and the small size of the mesh openings prevents you from firing effectively through it so gate must be opened to fire.
