## Police Pistol Combat Program Bulletin

Number	16-1
Rule	3.10
Topic	Production Semi-Automatic Pistols
Sub-Topic	Approved Replacement Sights
Date	1-24-2016
Revised	9-13-2019

On January 9, 2016 the NRA Board of Directors approved the amendment of Police Pistol Combat Rule 3-10 to allow the limited installation of other than original equipment factory sights on Production Semi-Automatic Pistols.

You may now change the sights on approved Production Semi-Automatic Pistols listed in Police Pistol Combat Bulletin 14-1 with;

“a factory fixed or adjustable service sights with another service type sight, luminescent service sight, or fiber optic service sight sold by the pistol’s manufacturer as a factory catalog replacement part for the pistol, or with a sight on the Production Semi-Automatic Pistol Approved Sight List on the NRA Law Enforcement Competitions website. In no case may the firearm be altered for any sight installation”.

*For the full text and specifications please see Section 3.10 in your PPC Rule Book*

When contemplating changing original sights competitors need to remember that;

- The maximum sight radius for Production Semi-Automatic Pistols is 7.5 inches.
- NO alteration of the pistol or sights can be made to install replacement sights.
- The pistol must meet all other specifications in the Police Pistol Combat Rules.

Approved replacement sights for Production Semi-Automatic Pistols are listed on the next pages in alphabetical order by Manufacturer and then by Handgun the sight company makes the sight for. Your Handgun MUST be listed by the Manufacturer. The listing is updated as necessary based on competitor inquiries and requests.

### ~ Note ~

**Replacement Sights must keep with the theme of the Production Semi-Automatic Pistol program – that is, this is a Duty Gun program with Duty Sights.**

**No matter what APPROVED Replacement Sight is used, the sights MUST keep a Duty Gun Point of Aim/Point of Impact, not a competition set up, such as a Neck Hold, Shoulder Hold, or Head Hold and be made for your make & model handgun.**

**A Duty Gun Point of Aim/Point of Impact sight set up requires the sights to be aligned on the X Ring/Center Mass to get a bullet to obtain a Hit in the X Ring/Center Mass.**

**Pistols with competition sight set ups will be Disqualified, even if having already been used to fire a Match. Competitors may be required to allow their pistol to be test fired or checked with a laser boresighter to check the sight set up.**

## **Approved Replacement Sights for Production Semi-Automatic Pistols**

**The Sight you select MUST be listed for you Handgun by the Sight Manufacturer**

<b>Approval Number</b>	<b>Manufacturer &amp; Handgun Approved For</b>		
101	Ameriglo Tall Suppressor 3 Dot Tritium Set		Sight must be listed by Ameriglo for the approved Production Semi-Automatic Pistol it will be installed on with no alteration required.
