

## Police Pistol Combat Program Bulletin

Number	19-1
Rule	3.10.1, 3.10.2 & 3.3.2
Topic	Production Duty Optic Pistols and Open Class Duty Optic Pistols
Sub-Topic	Approved Duty Optic Sights
Date	3-2-2019
Revised	2-20-2025

Duty Optics that are listed as Approved in this Bulletin are allowed on approved Production Duty Optic Pistols, Off Duty Production Duty Optic Pistols and Open Class Duty Optic Pistols.

Requirements for Duty Optic sights include;

- ☐ Be non-magnified and manufactured and marketed as a law enforcement or military handgun optic sight.
- ☐ Suited for law enforcement duty use considering such things as size, weather resistance, holster fit, and availability.
- ☐ After being powered ON, the optic must remain ON for a minimum of 14 hours without any action being required by the shooter to draw and fire.  
It may go into an automatic power saving mode and come to full power automatically when drawn, when motion is detected, when it detects light changes, or by other automatic means.  
Power conservation cannot be obtained by requiring or recommending the use of a sight/dust cover, covering of sensors, or by other non-automatic means.
- ☐ Must mount without any modification to the handgun as originally manufactured when installed on Production Duty Optic Pistols . Open Class Duty Optic Pistols can be externally modified for optic mounting. The optic cannot be altered in any way.
- ☐ For Production Duty Optic Pistols: Mounting can be done using an Optic Ready Plate system, or by removing the rear sight and replacing it with a dovetail optic mount that incorporates a built in rear sight or mounting for a replacement rear sight as long as no modification is made to the handgun.
- ☐ The pistol should have co-witnessed front and rear sights, but the rear sight may be removed to mount the Duty Optic or to use a stock Optic Ready Plate.
- ☐ Battery replacement should be able to be done without removing the sight, or mount, from the handgun to avoid the chance of loss of zero and allow batteries to be quickly and easily replaced in the field.

Competitors who find a handgun Duty Optic they feel meet the specifications for Police Pistol Combat Program Duty Optics and would like it reviewed for inclusion in the Approved Duty Optic List may contact Law Enforcement Competitions at [LEcompetitions@nrahq.org](mailto:LEcompetitions@nrahq.org).
