

Police Pistol Combat Program Bulletin

Number	19-1
Rule	3.10.1
Topic	Production Duty Optic Pistols
Sub-Topic	Approved Duty Optic Sights
Date	3-2-2019
Revised	N/A

On January 5, 2019 the NRA Board of Directors adopted Police Pistol Combat Rule 3-10.1 establishing a Production Duty Optic Pistol category with its own Classification.

Handguns must be listed as Approved in Police Pistol Combat Bulletin 14-1 and the Duty Optic must be listed as Approved in this Bulletin as established by Police Pistol Combat Rule 3.10.1 printed below.

3.10.1 Production Duty Optic Pistol: Pistols meeting the specifications for Production Pistol in Section 3.10 and are listed as Approved in Police Pistol Combat Bulletin 14.1 may be equipped with an Approved non-magnified optic suitable for duty use. The Duty Optic must be listed as Approved by NRA Law Enforcement Competitions in Police Pistol Combat Bulletin 19.1 on the Law Enforcement Competitions website. See Rule Book Section 19.1 for PPC Classifications.

To be considered for approval, Duty Optics must mount without any modification to the handgun as originally manufactured. Swapping the original slide to an aftermarket slide with optic mount cuts is not allowed since the handgun is no longer as originally manufactured.

After being powered ON, the optic must remain ON for a minimum of 14 hours without any action being required by the shooter to draw and fire. This would cover a typical 12 hour shift plus some extra time. Duty Optics may go into an automatic power saving mode and come to full power automatically when drawn, when motion is detected, when it detects light changes or by other automatic means.

The pistol should have co-witnessed front and rear sights, but the rear sight may be removed to mount the Duty Optic or to use a stock Optic Ready Plate.

Following the Rule, to be considered for approval the optic must;

- Be non-magnified, and manufactured and marketed as a law enforcement or military handgun optic sight.**
- After being powered ON, the optic must remain ON for a minimum of 14 hours without any action being required by the shooter to draw and fire. It may go into an automatic power saving mode and come to full power automatically when drawn, when motion is detected, when it detects light changes, or by other automatic means.**
- Must mount without any modification to the handgun as originally manufactured.**
- Mounting can be done using an Optic Ready Plate system, or by removing the rear sight and replacing it with a dovetail Optic Mount as long as no modification is made to the handgun.**

Competitors who find handgun optics they feel meet the Rule requirements and would like them reviewed for inclusion to the Approved Duty Handgun Optic List may contact Law Enforcement Competitions at LEcompetitions@nrahq.org and request a review of for eligibility.
